

Portable, Wireless General Admission Ticketing has Arrived

THE FUTURE OF GENERAL ADMISSION TICKETING

FAST, CONVENIENT, WIRELESS

Utilising mobile phone and Bluetooth technology, the wireless portability of Ferret makes point of sale general admission ticketing fast, simple and easier to manage.

Understanding the sometimes complex task of the setting up of event infrastructure, Ferret gives you the freedom to ticket your general admission events without the need for mains power at point of entry, while minimising your patron queuing time considerably by roaming queues.

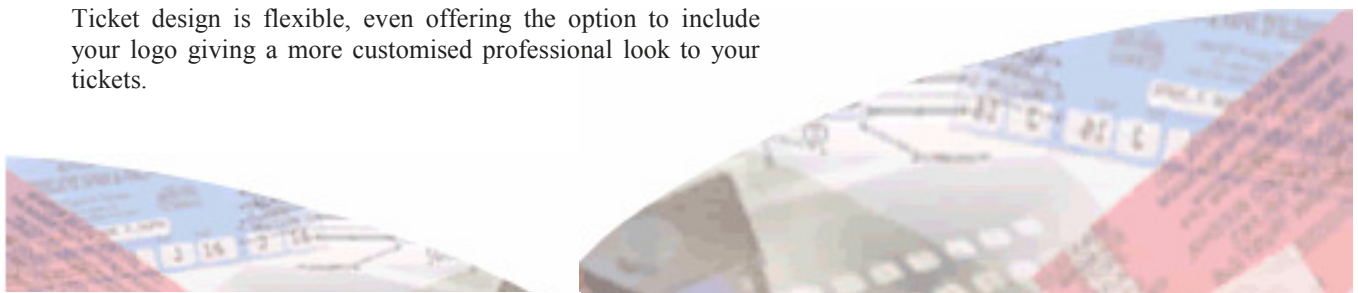

Ferret's intelligent capability of issuing multiple ticket types offers the issuing of the simplest of ticket types all the way up to complex day passes with vouchers.

Managing your general admission ticketing is made even easier with cashup reports and full audit trails. Allowing revenue control and event statistics to be analysed for future events.

Ferret enables you to have 9 separate users, plus a manager, each with their own 4-digit login for enhanced security and traceability.

Ticket design is flexible, even offering the option to include your logo giving a more customised professional look to your tickets.

- Wireless and easy to use
- Fast ticket issue, keeping queues to a minimum
- Cashup reports & Audit Trails
- Tickets fully traceable
- Flexible and customisable
- Customise your tickets by adding your logo & graphics
